Tutorial

Before beginning your tax map search, update your computer to the most recent free version of Adobe Acrobat Reader

[Adobe - Adobe Reader download](#) 

Accessing The Tax Maps

The tax map key (TMK) is written as a 5 or 6 number sequence which identifies a specific parcel's location on each county's tax map(s).

This TMK designates a parcel by:

<u>Division</u>	<u>Zone</u>	<u>Section</u>	<u>Plat</u>	<u>Parcel</u>	<u>Condominium</u>
1	2	2	4	6	000

Condominium # used only when necessary ie: residential condo properties.

In using our Tax Map resource service it is NOT necessary to physically enter this information in a search field – Just a series of mouse clicks is all you need do to access your desired tax map.

As the tax map opens on the island of your choice you are now in the specified division.

Next, left click the **red box** that corresponds to the Zone (2nd #) you are seeking.

Continue through this sequence through the *section* and *plat* search, increasing the magnification of your screen view as necessary

To view the individual parcel use the navigation bars on right and bottom of map to move around the plat.

***As there may be several numbers on each parcel, please note that the parcel number has the lines beneath , ie.**
